GENERAL INFORMATION:
APPLICANT: ROSELtaGemonics
APPLICANT: ROSELtaGemonics
TITLE OF INVENTION: BIOINFORMATICALLY DETECTABLE GROUP OF NOVEL VIRAL REGULATORY GENE
TITLE OF INVENTION: USES THEREOF
FILE REFERENCE: 47487
CURRENT APPLICATION NUBER: US/10/310,188
CURRENT FILING DATE: 2002-12-19
NUMBER OF SEQ ID NOS: 86841
SEQ ID NO 12327
LENGTH: 20
                       Sequence 5931, Application US/10289762
GENERAL INFORMATION:
TYPLE INFORMATION: Chlamydia pneumoniae genomic sequence and polypeptides, fragments TITLE OF INVENTION: thereof and uses thereof, in particular for the diagnosis, preveritte OF INVENTION: and treatment of infection
FILE REFERENCE: 9710-003-999
CURRENT APPLICATION NUMBER: US/10/289,762
CURRENT FILING DATE: 2003-03-27
NUMBER OF SEQ ID NOS: 6849

Sequence 150, Application US/10206705

GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: ALbozyme Pharmaceutical, Inc.
APPLICANT: MCSWiggen, James
TITLE OF INVENTION: RNA Interference Mediated Inhibition of Protein Tyrosine Phosphat,
TITLE OF INVENTION: RNA Interference Mediated Inhibition of Protein Tyrosine Phosphat,
TITLE OF INVENTION: (PTP-1B) Gene Expression using Short Interfering RNA
TITLE OF INTERVION: 800/035, MBHB02-738)
CURRENT APPLICATION NUMBER: US/10/206,705
CURRENT APPLICATION NUMBER: US/10/206,705
CURRENT PILING DATE: 2002-07-26
NUMBER OF SEQ ID NOS: 388
SOFTWARE: Patentin version 3.0
SEQ ID NO 150
IRNGTH: 19
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ; OTHER INFORMATION: Description of Artificial Sequence: Target sequence/siNA sense rous-10-206-705-150
